### **Reasons for Allowance**

1. This application has been examined. The amendment filed 6/28/05 has been entered.

2. The following is an examiner's statement of reasons for allowance: The amendment filed 6/28/05 places the application into condition for allowance by canceling out the rejected claims. The technique of the present invention matches text entry fields from among a plurality of text fields based first on identifying the one which has a predetermined text entry characteristic, and then based on a predefined relationship between the position of the identified text field and the position of a specific second text entry field from among a remainder of text entry fields, identifying the second text entry field. Note that as brought out in the prosecution, the claim language is interpreted thus as being more than two text entry fields, in that after the first text entry field is identified, the matching secondary text entry field is identified from still among a plurality of remaining text entry fields. The technique thus determines from a plurality of text entry fields displayed on a computer monitor, the locations of at least two text entry fields having a predefined relationship for the purpose of facilitating a system logon process. The combination of features as brought out in the independent claims (1 amended – method, 16 amended - system, 21 amended – method which brings out the details of creating the macro and substituting the placeholder) is not set forth in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
